

1 NEW CONTRACTS WON

Our magazine deliveries are growing!

Alongside Total TV Guide, New World and The Spectator, we are now welcoming TV & Streaming Weekly and TV Times to our rounds.

It's all about making our network work harder - more deliveries in the same areas means denser rounds, better efficiency and greater earning potential for our delivery partners.

And we're just getting started, with more titles on the way!

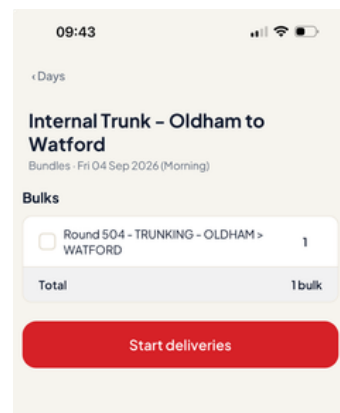

2 NEW DRIVER APP

The new and improved driver app has now launched and is being rolled out across our contractor driver base.

The app is slicker, faster, with a number of enhancements based on your feedback. It's designed to make managing deliveries easier & improve the overall user experience.

Make sure you have registered your email address so that your deliveries are linked to the new app! You will be sent a link to download the app from Google Play or Apple App Store and start using it.

3 UPDATED ROUTING SYSTEM

We have improved our routing system so that routes can better support the increasing magazine volumes being delivered across the network.

Think of it like a taxi meter. A taxi driver starts getting paid as soon as the meter is switched on. In the same way, once your delivery route begins and as long as you are following the route, you are being paid and the "meter is running".

These changes will help us accommodate growing volumes while providing a fairer and more transparent approach to mileage payments for drivers.

4 TOP TIPS

With darker mornings now upon us, remember to take a torch with you to help find the correct address safely and easily.
